WASTE PREVENTION GRANT SCHEME 2020

This scheme supports communities to take steps on waste prevention, re-use and repair activities in their local areas, and encourage partnership between local businesses, schools, charities and voluntary groups.

Waterford City and County Council is offering community groups an opportunity this year to promote waste prevention, creating an opportunity to look at waste differently and to determine if we can handle our resources better and encourage a circular economy.

Funding will be considered for projects with a definitive aim, targeting a specific group and can provide an estimate of waste prevented (by weight) within the project period. Projects will be assessed by assessment criteria and these criteria should be reflected in the project details; be aware of the assessment criteria against which your project will be evaluated (illustrated on the application form).

The maximum funding for each waste prevention project is €500. Previous examples of funded projects include up-cycling community workshops creating sustainable products from waste, food waste prevention, repair/up-cycling events for Re-Use Month (October annually), bicycle repair workshops and projects that encourage the elimination of single use plastic within a community setting.

How to Apply:
The waste prevention grant application form is available at http://bit.ly/WastePreventionGrant2020 or from the Environment Section, Waterford City and County Council, phone no.: 0761 10 20 20. The Grant Application Form should be completed and returned to the Environment Section for consideration by the closing date 13th March 2020.
