PROPOSED ONE-WAY SYSTEM – HENNESSY’S ROAD, WATERFORD

I refer to previous discussions in relation to Hennessys Road and issues pertaining to traffic flow and safety concerns. The Council is considering a one-way system along a section of Hennessy’s road, as set out in the drawing below. This proposal would see Hennessy’s road, becoming one way from its junction with College street to its junction with Blakes lane.

This proposal would improve traffic flow and provide space for a wider footpath and cycle lane while also addressing traffic safety concerns in the area, especially at the junction with Blake’s lane.

If members are agreeable it is proposed to advertise it for public consultation and report back on the outcome of the submissions received and further discussion. Your approval to advertise the proposal is requested.

Fergus Galvin,
Director of Services,
Roads, Water and Environment.
