Economic Elements of the LECP

- The economic elements of the LECP will guide and support the economic development role of the Local Authority within the wider regional context.
- The core drivers of the economic elements will be:
- Sustainable Economic Development Objectives (SEDOs). The LECP should set out a finite set of key objectives which need to be prioritised to make a significant contribution to achieving required overall economic development outcomes. The SEDOs need to be specific, measurable and have and associated timeframe and the LECP should specify relevant outcomes in respect of each objective and appropriate metrics for measuring those outcomes.
- Specific **actions** and practical measures by which the Sustainable Economic Development Objectives (SEDO)s are to be achieved, identified in conjunction with the Regional Spatial and Economic Strategy (RSES) and the Regional Enterprise Plans(REPs), and relevant economic development agencies should be set out in the LECP Implementation Plans Timeframes.
